What's New in the?

The utility is designed for use with Canon PIXMA MX892 printers and scanners. On the left side of the program interface you can find links to all most used parts of the program, if you click on the buttons or links you will see the corresponding window opened. * Scanner tool (see HELP button for usage info): scans in High Resolution, Optionally allows you to select the papersize from a list of sizes. The Size option is available only if you select High Resolution. Automatic Paper Size detection (see Help button for usage info): Optimizes the parameters of the scan for your paper size. The paper size is selected from a list of known sizes. For more info see the Help button. Print to file and create PDF/PS (see Help button for usage info): Allows you to create a file of any type and optionally to use one of the default installed pdf printers. The default settings are suitable for most situations. Create a PDF with your original settings (see Help button for usage info): Allows you to select the paper size and the resolution for the best result. There are options to crop or select the page size. The size of the paper can be selected from a list. There are options to print the image or to save it to a file. * Printer settings (see Help button for usage info): allows you to set printer parameters such as the color or monochrome setting, paper size, resolution, etc. and create or print a PDF. * Fax settings (see Help button for usage info): allows you to send a fax. By default the driver will use the default fax settings, but it is possible to use the built-in fax functionality of the MX892 or to manually setup the fax settings. Note: You can choose to send e-mail with images and a fax, which will allow you to e-mail a PDF to the recipient. * Sorting options (see Help button for usage info): allows you to sort pictures alphabetically or by file type. * Print settings (see Help button for usage info): allows you to print a number of pictures at once. * Conversion options (see Help button for usage info): Allows you to convert selected files to a number of other file types. This option will appear only if your MX892 has been connected to a computer using a USB interface.
