Users can now apply their edits and save directly in the browser. Additionally, users can now add support for Windows Mixed Reality headsets, and they can make any edits and changes directly in the browser without needing to convert the image into a different file or import it into Photoshop. Users can select which devices to support using the new Cardboard VR format, the new options are: Use Cardboard Camera and Cardboard Headset (VR headset). When Made in Photoshop is clicked on, the native OS device will be detected by Photoshop. Finally, users can export the same image file to the same image format when a local link or file is used, other than Making links and Saving files.
