Cracking Adobe Photoshop is a bit more involved, but it can be done. First, you'll need to download a program called a keygen. This is a program that will generate a valid serial number for you, so that you can activate the full version of the software without having to pay for it. After the keygen is downloaded, run it and generate a valid serial number. Then, launch Adobe Photoshop and enter the serial number. You should now have a fully functional version of the software. Just remember, cracking software is illegal and punishable by law, so use it at your own risk.

My only real problem with the latest iteration of Lightroom is the lack of support for Exiting (and Entering) the app from the app switcher. Lightroom for iPad can exit the app by tapping the Home button on the app switcher. This should allow you to wait until the iPad is plugged in, press the

Home button, unplug it and then go back to the app switcher without losing everything you were working on. It would be a sad day if this was removed. Now, both exits and enters work, although the latter is less responsive than it should. Still, onward and upward! Lightroom for iPad is, to put it bluntly, speed-conscious. The user interface has some learning curves. Still, with the right information, you can grow with it. Simply put, it is far more useful than any other similar software on the iPad. Even though I probably admire his modesty more than anything else, one way to explain features of Photoshop is that it is both a desktop-based and a mobile app. You can view, edit and work on a photo on any device. It may take a bit to get used to the interface, but it is flexible and that is part of its charm, especially when you want to share your work on multiple platforms. And while you may not create pixel-rich designs, you can still use Photoshop for simple image editing tasks to, for example, crop images, retouch or make changes to contrast, colors or the like. I don't feel inclined to rate it, as anything that is better than the competition is good enough. And believe you me, there is a lot of competition.
